

DLK Pro – the all-rounder for mobile data downloading

Tailor-made for various requirements

VDO

Simply brilliant, brilliantly simple

The DLKPro is the VDO product family, which sets new standards for data downloading and archiving. Handy and small, each one of these innovative, mobile products in mobile phone format is outstandingly user-friendly, with highly efficient work routines and the highest level of data security.

Efficiency

Thanks to their integrated chip card readers, the products of the DLKPro family are not only ideal for downloading mass memory data, they can also be used for downloading data straight from the driver card – so you can carry out two tasks with one device.

Security

You can make a backup copy of your data on an external SD card at any time, thanks to the integrated SD card reader. This means that the Keys of the DLKPro family can also be easily used as archiving tools.

Comfort

Operating the mobile handsets couldn't be easier, thanks to the large full-colour touch screen. Aided by explanatory icons, you can navigate easily through the menu and also visualise and view the downloaded data on site.

Simplicity

The Keys enable you to easily transfer data to a computer, where you can use the included PC programme to comfortably visualise it, archive it and print it out.

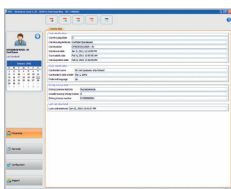

DLK Pro Download Key – simple data handling

For fleets, workshops and authorities, the DLK Pro Download Key is the ideal transport medium for downloading mass memory and driver card data from digital tachographs.

Reminder for due downloads

PC display of download files

With the DLK Pro Download Key you can

- download vehicle data via the front interface of the digital tachograph.
- use the integrated chip card reader to download data straight from the driver card (if licenced).
- archive driver and vehicle data as per legal requirements.
- transfer data to a computer quickly and easily via the USB interface.

The DLK Pro Download Key offers you

- a full-colour touch screen for comfortable operation and for displaying the last download.
- an SD card reader to doubly secure your data.
- a reminder function for required downloads to ensure adherence to legal requirements.
- an integrated rechargeable battery for driver card downloads and for activating the integrated touch screen – no power supply required. All other functions are available without the need for the loaded rechargeable battery.
- 29 available languages.

Small fleets and owner drivers can also use the DLK Pro Download Key as an archiving tool.

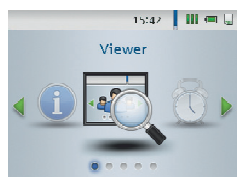

DLK Pro TIS-Compact (EE) – tailor-made for Eastern Europe

Specially developed for use in Eastern European countries, the DLK Pro TIS-Compact (EE) is available in all Eastern European languages. It is ideal for owner drivers and small fleets with up to 5 vehicles and 10 drivers.

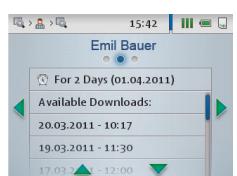

With the DLK Pro TIS-Compact (EE) you can

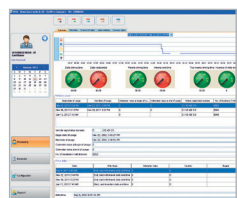

- download vehicle data via the front interface of the digital tachograph.
- use the integrated chip card reader to download data straight from the driver card.
- check driver and vehicle data for infringements quickly and easily.
- archive driver and vehicle data as per legal requirements.
- transfer data to a computer quickly and easily via the USB interface.
- view the activities of individual drivers (driving time, working time and rest periods) and speed profile for the previous 24 hours of driving time.
- export data to other PC applications.
- print out the recorded vehicle and driver data.

View data on the Key

Detailed view of existing and due downloads

Evaluation of the speed data

The DLK Pro TIS-Compact (EE) offers you

- a full-colour touch screen for comfortable operation and a quick view of the downloaded and saved data and infringements.
- automatic signature checking of downloaded files and notification if any files are corrupt.
- an SD card reader to doubly secure your data.
- a reminder function for required downloads to ensure adherence to legal requirements.
- an integrated rechargeable battery for driver card downloads and for evaluating data on the integrated touch screen – no power supply required. All other functions are available without the need for the loaded rechargeable battery.

The TIS-Compact (EE) can be used as a solution for downloading and archiving data and for small-scale data management – it also displays infringements on the screen.
